

Deleting Old Competitors from a Series

The purpose of this document is to describe the steps necessary to delete any old competitors contained in a sailing series to prevent out of date handicaps to be adopted.

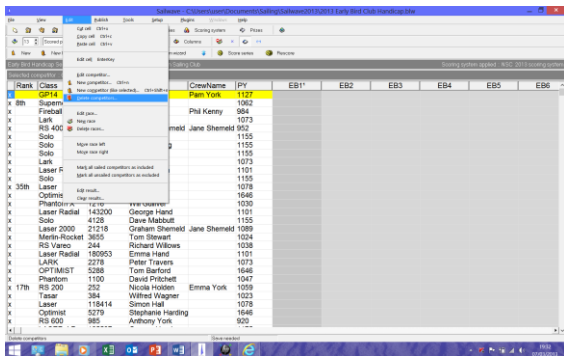

Open Sailwave file to be worked on.

Just above the 'Score series' button is a button with 'X' on it (exclude competitors button) – it will look pressed already

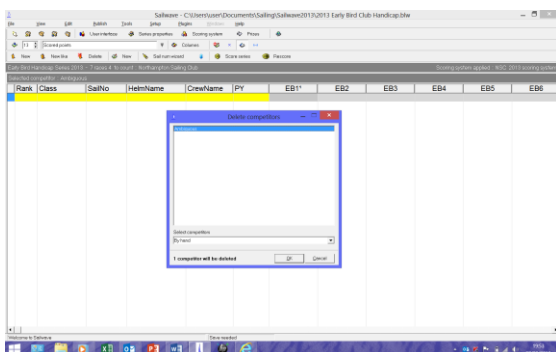

Unpress the 'x' button which will reveal all the excluded competitors – will probably reveal a long list of old competitors with wrong handicap figures.

Go to edit tab and select delete competitor

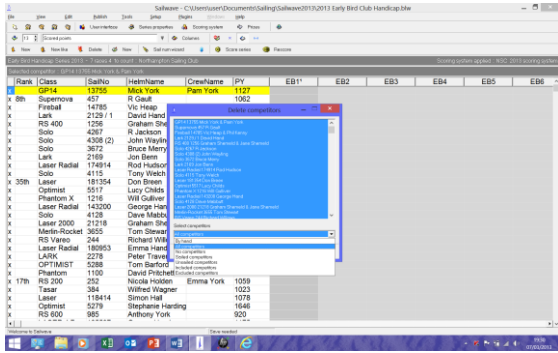

In the dropdown box make sure 'by hand' is selected.

Select each line for each competitor to be deleted, (multiple selections are allowed) and then press OK.

Make sure you do not select 'all competitors' as you will lose any race entries you have made for those sailors so far. *Only do this if no races have been entered into the series.*

This will then delete all competitors selected and remove the possibility of having old PY's interfering with scoring races.
